Charging Schematic Diagram

Please ensure that the thickness of phone case is less than 5mm

EN

Package Contents

- Wireless charger
- USB-C charging cable
- User manual

Operation Steps

1. Connect the charger to a 9V/2A QC3.0 adapter with a USB-C quick charge cable to switch on the power.
2. Put the mobile phone with magnetic suction function near the charging area of the wireless charger, and it will automatically absorb the mobile phone for charging.
3. Place your headset in the headset charging area to recharge.

Applicable Devices

1. Smartphones:
Magnetic alignment is only available for iPhone 12 series (for iPhone 12, for iPhone 12 mini, for iPhone 12 Pro, for iPhone 12 Pro Max). Mobile phones that support Qi wireless charging standard.
2. Headset:
For AirPods 2 / Pro, other TWS headsets with wireless charging support.
3. Compatible for iPhone 12 case (for MagSafe silicone case / for MagSafe clear case).

LED Status Indication

LED status	Standby mode	Charging	FOD
LED	On	Off	
Power/FOD LED	On	Off	Flash

Product Specification

Input: 9V/2A
 Phone Output: 15W/10W/7.5W/5W
 Headset Output: 3.0W
 USB Output: 5V/1A
 Input Interface: USB-C port
 Transmission Distance(Phone): ≤8mm
 Conversion Rate(Phone): ≥73%
 Product Size: 156.75x91x91(mm)6.17x3.58x3.58(ft)

Safety Instructions

1. Charging devices that meet the Qi charging standard.
2. Charging output maximum power fast charging 15W, compatible with fast charging 10W, 7.5W and general charging 5W.
3. Magnetic calibration adsorption, mobile phone automatic adsorption charging when put on.
4. Safety guarantee: overheating protection, overcurrent protection.

Warning

1. Do not pull the power cord hard to avoid the power cord from breaking or falling off.
2. Do not disassemble by yourself or throw it into fire or water to avoid short circuit and leakage.
3. Do not use in severely high temperature, humidity or corrosive environments to avoid leakage of electricity due to damage to the circuit.
4. When using this product, keep a distance of more than 50cm from the pacemaker.
5. Only use the wireless receiver conforming to Qi standard to connect with the transmitting terminal.
6. The working environment temperature of the charger is 30°C-32°C.

EN

7. Do not place the magnetic card, magnetic recording medium and precision machine too close to the charger.
8. Keep out of reach of children.

Answer Questions

- If you're experiencing interrupted or slow charging check the following:
- (1) The back of your phone should not have any metal, pop sockets, or credit cards.
 - (2) Put the phone in the center of the charging surface (this lets the charging coil in your phone lineup with the one inside the wireless charger).
 - (3) The wireless charging coil on Sony phones is located slightly below center.
 - (4) Phone cases should be no thicker than 5 mm for effective charging.
 - (5) Check whether the adapter is QC3.0 fast charger.
2. If you're failing to charge your device, please try out the following
- (1) Please restart your cell phone and test with other USB cable
 - (2) Please check whether the indicator turns on or not
 - (3) The wireless charging coil on Sony phones is located slightly below center.
 - (4) Phone cases should be no thicker than 5 mm for effective charging.
 - (5) Check whether the adapter is QC3.0 fast charger.
3. If you're failing to charge your device, please try out the following
- (1) Please restart your cell phone and test with other USB cable
 - (2) Please check whether the indicator turns on or not
 - (3) Please check the adapter is QC3.0 fast charger (output 9V / 2A), iPhone original adapter does not match the wireless charger.
 - (4) Please check your phone case thickness (<5mm). Metal ring or magnetic pad are restricted.
4. If you're using the recommended wireless charger with the QC3.0 adapter and have removed any potential charging obstructions, but are still experiencing issues, try:
- (1) Replacing the cable connecting your the wireless charger.
 - (2) Rebooting your phone.
 - (3) Unplug the adapter and reinsert.

EN

5. Charging is still slow
The mobile phone itself or the external receiving coil allows the wireless charging current to be different, or the application running consumes a lot of power when the mobile phone is charging. It is recommended to reduce or close the application.
6. The phone is charging intermittently or the indicator light flashes.
If the charging current is not enough, please use a charging head (adapter) with sufficient power 9V2A or 18W above.
7. Heating while charging.
It is normal for the receiving coil or transmitter board to generate heat during wireless charging. If the plate is too warm, take your phone off the plate, and switch the plate off. The plate may switch off automatically if it is too hot. When the plate has cooled down, try charging again.
8. The charger does not work.
Do not put metal debris or magnetic cards on the charging area. If the product does not work due to overheating please take off the phone and wait for it to cool down and try charging again.
9. If the host fails, contact after-sales service.

FCC

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the distance between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
